

Pine View Primary School Education Support Program

All curriculum areas are covered within the education support programs and are adapted to the diverse needs of students. Complementing a whole school focus on progressing literacy and numeracy skills, the education support program will additionally have a strong commitment to pastoral care, life skills, friendship groups and protective behaviours as priority areas. Our success in these programs are demonstrated by the inclusive culture that develops within the program and the broader school community.

Pine View Primary School undertakes Auslan as our language and if appropriate our Education Support students will be included in these lessons. All students are provided with opportunities to communicate using various tools and strategies. Incorporating technology and learning through iPads, communication devices, interactive whiteboards, computers, cameras and appropriate academic online programs are widely embraced by our students.

Pine View Primary School Education Support Program

Pine View Primary School

Education Support Program

Enrolling Students with a Disability:

All enrolment applications are accepted and assessed according to the Department of Education enrolment procedures. Access to the education support programs is discussed with parents along with other options that are available within the Department of Education WA system.

Education Support Program enrolment applications are considered on the same basis as applications made to an Education Support Centre. Education support criteria are described in the Department of Education Enrolment for Students with Disability support document.

The criteria for Pine View Primary School Education Support Program are:

- ◆ Students with an Intellectual Disability or Global Development Delay and who are eligible for an Individual Disability Allocation under this category.
- ◆ Students with eligibility for an Individual Disability Allocation for Autism Spectrum Disorder and a demonstrated high education need.

All applications are subject to eligibility approval by the Department of Education.

Pine View Primary School

Education Support Program

Pine View Primary School offers an Education Support Program which is dynamic and specialises in education for students with mild to moderate special needs. Kindergarten to Year 6 students with Special Needs, including Global Development Delay, Intellectual Disability and Autism (with high educational needs), may be eligible to enrol.

The Education Support Program is equivalent to that available at a metropolitan Education Support Centre. Within the context of a mainstream setting, the school is dedicated to working collaboratively to establish partnerships with parents, the community and relevant agencies to develop a holistic approach to learning that caters for each student's individual needs.

We believe our school motto 'Play Inspire Nurture Explore', embraces the partnerships we share together. Our inclusive education strengthens our learning and sense of community. Pine View Primary School provides excellent, individualised, practical educational programs promoting the social, intellectual, emotional and physical development of all students within a positive, caring and inclusive environment.

Pine View Primary School

Education Support Program

Each Education Support Student will have an Individual Education Plan developed through strong case conferencing processes in collaboration with parents, teachers and other agencies such as school psychologists and therapists. Students are supported to embrace opportunities to fulfil their education and personal goals in order to successfully participate in all aspects of their lives and their communities.

Experienced teachers and education assistants with expertise and training in educating students with disability, will provide the Education Support Programs.

Pine View Primary School will cater for students' needs within a specialist education support environment and when appropriate, within mainstream classes. We have small class sizes to better meet the needs of each student. Students are grouped into age related classes of between eight and ten students with a teacher and education assistants. Each class will have life skills programs in addition to academic programs to reinforce and practise skills taught. We will have a strong emphasis on communication skills and developing self-managing skills. We will undertake regular review, modification and evaluation of the programs we offer.
